OUTCROP GOLD CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended November 30, 2020

(Unaudited – Stated in Canadian dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Outcrop Gold Corp. (“Outcrop” or the “Company”) is a publicly traded company incorporated under the laws of the Province of British Columbia, Canada. The Company’s shares are listed on the TSX Venture Exchange (“TSX-V”) under the symbol OCG. The corporate registered and records office is located at #905 – 1111 West Hastings Street, Vancouver, BC V6E 2J3. The Company is engaged in the identification, acquisition, exploration, and development of exploration and evaluation assets primarily in Colombia. These condensed consolidated interim financial statements of the Company for the three months ended November 30, 2020 comprise the Company and its subsidiaries. The Company has not placed any of its exploration and evaluation assets into production and is therefore considered to be in the exploration stage.

These condensed consolidated interim financial statements are prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. The Company’s ability to continue on a going concern basis depends on its ability to successfully raise additional financing for the substantial capital expenditures required to achieve planned principal operations. While the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company.

These material uncertainties raise substantial doubt regarding the Company’s ability to continue as a going concern. These condensed consolidated interim financial statements do not reflect adjustment that would be necessary if the going concern assumption were not appropriate, which could be material.

COVID-19 (the coronavirus) has threatened a slowdown in the global economy as well as caused volatility in the global financial markets. The extent to which COVID-19 may impact the Company’s business will depend on future developments such as the geographic spread of the disease, the duration of the outbreak, travel restrictions and social distancing, business closures or business disruptions, and the effectiveness of actions taken in Canada, the United States and other countries to contain and treat the virus. Although it is not possible to reliably estimate the length or severity of these developments and their financial impact to the date of approval of these financial statements, these conditions could have a significant adverse impact on the Company’s financial position and results of operations for future periods.

2. BASIS OF PRESENTATION

a) Statement of compliance

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standards (“IAS”) 34, Interim Financial Reporting using the Principles of International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and the Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

These unaudited condensed consolidated interim financial statements do not include all the information required for full annual financial statements and, accordingly, should be read in conjunction with the Company’s annual consolidated financial statements for the year ended August 31, 2020.

b) Basis of measurement

These condensed consolidated interim financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

2. BASIS OF PRESENTATION (continued)

c) Functional and presentation currency

The presentation currency of the Company is the Canadian dollar.

Items included in the financial statements of each entity in the Company are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”), which has been determined for each entity within the Company using an analysis of the consideration factors identified in IAS 21 - *The Effects of Changes in Foreign Exchange Rates*. The functional currency of Outcrop, the parent company, is the Canadian dollar; the functional currency of the Company’s US subsidiary, Miranda Gold USA, Inc. is the United States dollar. The functional currency of all of the Company’s Canadian subsidiaries is the Canadian dollar, and the functional currency of all of the Colombian branch operations and Colombian simplified share companies is also the Canadian dollar.

d) Use of estimates and judgments

The preparation of the condensed consolidated interim financial statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, significant judgments made by management in applying the Company’s accounting policies and key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended August 31, 2020.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied by the Company in these condensed consolidated interim financial statements are the same as those applied by the company as at and for the year ended August 31, 2020.

New standards, interpretations and amendments adopted during the period

A number of new standards, amendments to standards and interpretations are not yet effective as of November 30, 2020 and have therefore not been applied in preparing these condensed consolidated interim financial statements. None are expected to have a material effect on the financial statements of the Company.

4. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following categories: Fair value through profit or loss (“FVTPL”); amortized cost; fair value through other comprehensive income (“FVOCI”).

The carrying values of the Company’s financial instruments are classified into the following categories:

Financial Instrument	Category	November 30, 2020		August 31, 2020
Cash	FVTPL	\$	4,456,190	\$ 5,952,245
Trade amounts receivable	Amortized cost		25,742	25,238
Marketable securities	FVTPL		11,460	5,730
Accounts payable and accrued liabilities	Amortized cost		555,925	532,079

The Company’s financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 – Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.

Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable, advances, and accounts payable approximate their fair value due to their short-term nature. Cash and marketable securities are recorded at fair value and are calculated under the fair value hierarchy and measured using Level 1 inputs.

Fair value of cash and marketable securities as at November 30, 2020 and August 31, 2020:

Financial instrument	Quoted prices in active markets for identical assets			Significant other observable inputs	Significant unobservable inputs	Total as at
	Level 1	Level 2	Level 3

5. MINERAL PROPERTIES

Outcrop acquires mineral properties through application, staking, and third-party vendors, some of which are subject to net smelter return royalties (“NSR”) or underlying lease payments. Subsequent to the acquisition of mineral properties, the Company may enter into agreements to sell a portion of its interest in its mineral properties to third parties in exchange for exploration expenditures, royalty interests, cash, or share-based payments.

Outcrop cannot guarantee title to all of its mineral properties as the properties may be subject to prior mineral rights applications with priority, prior unregistered agreements or transfers, and/or the title may be affected by undetected defects. Certain of the mineral rights held by Outcrop are held under applications for mineral rights and until final approval of such applications is received, Outcrop’s rights to such mineral rights may not materialize and the exact boundaries of Outcrop’s properties may be subject to adjustment.

Mineral properties deferred to the condensed consolidated statements of financial position at November 30, 2020 are as follows:
